

Stearinlyset

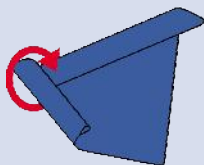

1. Læg servietten med bagsiden opad, og fold den diagonalt.

2. Fold den lange (lukkede) side ca 2 cm ind.

3. Rul den herefter stramt fra en af siderne mod den anden sådan, at servietten tager form som en cylinder.

4. Brug evt en klips eller servietring til at holde sammen på cylinderen, og stil "lyset" på tallerkenen.
